

## Technical Data Sheet

### Commendamide

#### Compound Information

|                    |                                                 |
|--------------------|-------------------------------------------------|
| Product Name:      | Commendamide                                    |
| CAS No.:           | 193825-78-4                                     |
| Molecular Formula: | C <sub>18</sub> H <sub>35</sub> NO <sub>4</sub> |
| Molecular Weight:  | 329.47                                          |
| Storage:           | -20°C                                           |
| Revision Date:     | 2026-04-15                                      |

#### Analytical Information

| Tests       | Specifications                                                                                                                                                         |
|-------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Description | Commendamide is an N-acylamide natural product isolated from <i>Bacteroides vulgatus</i> and also a GPCR G2A/GPR132 agonist with an EC <sub>50</sub> value of 11.8 μM. |
| Form        | Solid                                                                                                                                                                  |
